

THE ALBERTA MUNICIPAL SOLAR PROGRAM

WHY INSTALL A SOLAR PV SYSTEM?

It's Established Technology

- Solar PV technology has been around since the 1950s. Now, it's fully commercialized for large- and small-scale generation.
- Worldwide, more people are currently employed in the solar industry than the coal industry.

Falling Installation Costs – the cost to generate electricity from solar PV systems has fallen more than 90% from 1983 to 2015.

WHY THE AMSP?

Solar PV systems give you a reliable and affordable source of power for years to come.

Participants in the program cut system payback time by an average of 6 years.

WHAT YOUR SAVINGS COULD LOOK LIKE

The Town of Canmore Civic Centre Solar PV
Rebate: **\$35,891.71**

Annual energy savings: **\$6,847.90**

Payback: **14 years** Without Rebate: **19 years**

SOLAR PV & THE ENVIRONMENT

THE AVERAGE AMSP SYSTEM REDUCES
GHG EMISSIONS EQUIVALENT TO:

**416 VEHICLES
OFF THE ROAD
FOR ONE YEAR**

AMSP SO FAR

AS OF JANUARY 2018, THERE ARE:

**40 PROJECTS
UNDERWAY/COMPLETED
ACROSS
24 MUNICIPALITIES**

GET STARTED: SUBMIT AN AMSP EXPRESSION OF INTEREST

Submitting an AMSP Expression of Interest (EOI) is a quick, non-committal process that will give you helpful resources if you decide to implement solar PV in your municipality.

By submitting the AMSP EOI, your municipality will learn if your project is eligible and receive a high level estimate of your potential solar PV rebate, but you aren't committed to the program.

STEPS TO SUBMIT YOUR EOI:

1

Ensure your system is eligible for the program by reviewing the AMSP Guidebook.

2

Find a solar PV provider to help you with the EOI. Most assessments are free! Find a solar provider on the Solar Energy Society of Alberta's website.

3

Fill out and submit the EOI on our website: mccac.ca/expression-of-interest
