

# EVM Pre-Qualified Consultants List

The Electric Vehicles for Municipalities (“EVM”) program provides funding to municipalities to assist their transition to electrically-fueled Electric Vehicles. Rebates are available for a Feasibility Study to inform the municipality of the economic and environmental impacts resulting from a potential transition to an electrically-powered vehicle fleet.

**Note: a municipality may complete a Feasibility Study and apply again to the EVM program afterwards for Electric Vehicle and EV Charging Station funding.**

Municipalities are invited to contact Pre-Qualified Consultants from the list below for quotes to complete a Feasibility Study through the program. Municipalities must include the quote information in their application and sign the EVM Funding Agreement before funding may be reserved for your Feasibility Study.
