

## REC Program Allies

The Recreation Energy Conservation (“REC”) program helps municipally-owned recreation facilities reduce energy use and greenhouse gas emissions (GHGs) by providing rebates to help identify energy-saving opportunities and implement energy-saving projects. Through REC, municipalities can receive rebates for Scoping Audits and Engineering Studies that support investment decisions in addition to Implementation Project rebates for implementing energy efficiency retrofits.

Program Allies are professional firms with the ability to deliver Scoping Audits and Engineering Studies through the REC program. Program Allies can help participating municipalities identify and quantify energy-saving opportunities in their facilities that can be acted upon through an Implementation Project. Municipalities are invited to contact a Program Ally from the following list for quotes to complete a Scoping Audit or Engineering Study through the REC program. Municipalities must include the quote information in their application and sign an Offer Letter before funding is reserved for the project and work can begin.

## Disclaimer

Participating Program Allies listed above are independent businesses that are solely responsible for the performance and quality of their work. Companies licensed to complete engineering work in Alberta, including Engineering Studies through the REC program, must hold a Permit to Practice issued by the Association of Professional Engineers and Geoscientists of Alberta (APEGA), which can be verified by cross-referencing [APEGA's Permit Holder Directory](#). We recommend that all participants through the REC program complete the following:

- Obtain multiple quotes and project references from various Program Allies and perform their own due diligence in making a Program Ally selection
- Check references for a high degree of customer satisfaction from previous work
- Insist on entering a written contract with the selected Program Ally that references achieving Scoping Audit and Engineering Study requirements as outlined by MCCAC

The Municipality is responsible for vetting and selecting a qualified Program Ally and the Municipality shall only select a Program Ally that is on the Program Ally List above. Program Allies are not under the care or control of MCCAC or any of its affiliates. The MCCAC nor any of its affiliates are not, and shall not be, responsible in any way for any acts or omissions of any Program Ally. The MCCAC hereby disclaims any responsibility or liability in relation to work completed by a Program Ally. Neither the MCCAC, nor any of their affiliates are liable to the Municipality or to any other party for a Program Ally's failure to perform, for any damage to the Municipality's premises caused by the Program Ally, or for any and all damages to property or injuries to persons caused arising from any activities associated with the REC program.
